

# Palliative, end of life and bereavement care

Palliative, end of life and bereavement care in Gloucestershire is provided by many different services. All these teams have one goal in mind:

**To provide the very best care to the person with a life-limiting illness and support for their loved ones.**

We understand there are many mixed feelings and emotions when we think about the end of someone's life and recognise the importance of people getting the right advice and support when this is needed. The website pages were launched in March 2024 to provide guidance, education and support for people across Gloucestershire to help navigate the range of care and services available for people, their families and carers.

Information is provided for a range of different topics including:

- **Planning ahead** - enabling a person to think about what matters to them and plan for their future
- **Provision of palliative and end of life care** – providing information to help towards the end of someone's life
- **Bereavement care and support** – recognising the differing needs of people following someone's death.
- **Support for carers**
- **Spiritual Care and wellbeing**

The information is designed to be simple to access and includes links to further resources, videos as well as leaflets available to download.

**Scan the QR code to access the new webpages, or visit:**
